Our Debate and networking evenings bring together Key Personalities to discuss opportunities and challenges on SDGs, climate and Development Policies. Women's rights are getting more visible with S.D.G.5, women's march and social media campaigns. However glass ceilings, gender violence, pay gap or work life balance issues still make it more difficult for women. Most discrimination, inequalities and violence are invisible. In some countries, access to education, healthcare, water, contraception, freedom, employment are additional burdens. Several trends are conflicting with each other: progress and visibility on the one hand, regression and denial on the other. Can we analyze these trends for better gender and development policies? Is S.D.G.5 an endless challenge?
